First Aid

If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 min. Call a poison control center or doctor for treatment advice.

If Swallowed: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For additional information on this pesticide product (including health concerns, medical emergencies or pesticide incidents), you may call 1-800-922-HELP (4357) 24 hr/day, 7 days/week.

Note to Physician: Contains petroleum distillates. Vomiting may cause aspiration pneumonia.

Precautionary Statements

Hazards to Humans and Domestic Animals

Caution

Contains Petroleum Distillates. Avoid contact with skin or clothing. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Wear long-sleeved shirt and long pants, socks, shoes, and chemical-resistant gloves.

Personal Protective Equipment (PPE)

Applicators and other handlers must wear the following: long-sleeved shirt, long pants, chemical-resistant gloves made of any waterproof material, and shoes plus socks.

User Safety Requirements: Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with product. Do not reuse them.

User Safety Recommendations

Users should:

• Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

• Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

Environmental Hazards

This product is toxic to aquatic organisms, including fish and invertebrates. Do not apply directly to or near water. Drain and runoff may be hazardous to fish in water adjacent to treated areas. Do not contaminate water when disposing of equipment.

Note: This specimen label is for informational purposes only. All uses may not be approved in all states. See labeling which accompanied product for Directions for Use or call 800-777-8570 for more information.

EPA Reg. No. 499-539

Keep Out of Reach of Children

Caution

Wash-water or rinseate. See Directions for Use for additional precautions and requirements. This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.

Physical or Chemical Hazards

Flammable. Contents under pressure. Keep away from heat, sparks and open flame. Do not puncture or incinerate container.

Exposure to temperatures above 130°F may cause bursting.

Do not spray on plastic, painted, or varnished surfaces or directly into any electronic equipment such as radios, televisions, computers, etc. Do not use this product in electrical equipment (where there is exposed wiring or contact points) due to possibility of short circuits and shock hazard.

Directions for Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

User Restrictions

• Apply this product only as specified on this label.

• Do not use on agricultural crops, nurseries, or in commercial greenhouses.

• Do not apply this product in a way that will contact adults, children, or pets, either directly or through drift.

• Only protected handlers may be in the area during application.

• When applying as a space or general surface spray, do not remain in treated area. Exit area immediately and remain outside the treated area until aerosols, vapors, and/or mists have dispersed, and the treated area has been thoroughly ventilated. Do not allow adults, children or pets to enter the treated area until vapors, mists and aerosols have dispersed, and the treated area has been thoroughly ventilated.

• When applying as a residential outdoor surface and space spray: All outdoor applications must be limited to spot or Crack & Crevice® treatments only, except for the following permitted uses: (1) Treatment to soil or vegetation around structures; (2) Applications to lawns, turf, and other vegetation; and (5) Applications to building foundations, up to a maximum height of 3 ft. Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors and eaves) are limited to spot and Crack & Crevice applications only.

• Do not treat companion animals, such as dogs, cats, puppies or kittens, with this product.

• Do not make applications during rain.

• Do not apply directly to or near water, storm drains or drainage ditches. Do not apply when windy. To prevent product run-off, do not over-water the treated area(s) or apply when heavy rain is expected.

• When used in restaurants & food handling and processing facilities: Do not make space spray applications while facility is in operation. Prior to space spray operations, cover or remove food; and cover food processing surfaces and equipment or clean after treatment and before reuse. Do not use in serving areas (draining areas where prepared foods are served) while food is exposed.

• Do not use in aircraft cabins.

• When used in dairy barns or facilities: Close milk bulk tank lids to prevent contamination from spray and from dead or falling insects. Remove or cover milking utensils before application. Wash teats of animals before milking. Do not apply more than 1 time/day.

• When used in greenhouses grown ornamental and foliage plants: Do not use on Cyclamen and Nasturtium. Do not apply more than 1 time/day.

• Do not wet plants or articles to point of runoff or drip.

• Do not use treated articles until spray has dried.

Shake Well Before Using.

Use this product when temperature is above 60°F. If can temperature is below 60°F, store at room temperature until a temperature above 60°F is reached.

Application Instructions

Crack & Crevice Treatment: Use this product with the supplied actuator and injection tubes. Inject this product into cracks and crevices or void spaces where insects may be harboring, living and breeding. Place injector tip into cracks, crevices, holes and other small openings. Release approx. 1 sec of product. For light infestations, move injector tip along cracks while treating at the rate of 3 ft/sec. For heavy infestations, move injector tip along at 1 ft/sec. For closed voids, calculate the void’s cubic area and treat at the rate of 5 – 10 sec/ft³. Several holes may be required in long running voids.

Spot Treatments: Release product onto the surface. Do not exceed 2 ft² for each spot treatment. Repeat as necessary, but not more than 1 time/day.
CARPET BEETLES: Make spot or Crack & Crevice applica-
tions on and under edge of floor coverings, under carpets and
furniture and in closets or other places where these
insects are found. Entire carpets may be treated. When
treating entire carpets, see directions under Fleas and
Ticks. Repeat application as necessary, but not more than
1 timemay.

STORED PRODUCT PESTS: Make spot and/or Crack &
Crevice treatment to localized areas including shelves,
cupboards, walls and floors where food products sus-
pected of being infested are stored. Remove or cover food
before application. Application is supplemental to good
housekeeping, since it will have no effect on insects within
packaging. Space treatment is also permitted. Dispose of all
infested food packaging. Do not apply more than 1 time/day.

FLYING INSECTS - House Flies, Stable Flies and
Mosquitoes: Make spot treatment in insect resting or
landing areas. Space treatment is also permitted. Repeat
as necessary, but not more than 1 time/day.

AIRCRAFT (CARGO AREAS ONLY): Direct upward at
the rate of 2 – 4 sec/1,000 ft. Dispense in all locations.
Keep the treated area closed for at least 15 min and thorougly ventilate before re-entry.

INDOOR AND OUTDOOR TREATMENTS FOR
ACTIVE AND HIBERNATING BOXES OF BOXER
BUGS, ELM LEAF BEETLES AND CLOVER MITES: Insect
and cracks and crevices and/or walls where these insects may be
harbing or hibernating. Infested areas include, but are not limited
to, cracks and crevices, behind siding, wall voids, around windows
and door frames. Make spot applications around insect entry
points. Repeat as necessary, but not more than once every 7 days.

FLYING INSECTS: Treat outside surfaces of screens,
doors, window frames or whenever these insects may enter the
room. Also treat surfaces around light fixtures on porches, in
garages and other places where insects alight or congregate.
Repeat as necessary.

Treat normal fly resting areas such as ceilings, upper corners of
the area, around windows and doors, light fixtures and other sur-
faces known to attract flies. Hold can 1 – 2 ft from target surface
and apply at the rate of 1 oz can/250 – 375 ft² of surface
area. Treat so as to lightly moisten the target surface. Initiate
therapy at the beginning of the season and repeat as necessary
but not more than 1 time/day.

TO KILL MOSQUITOES OUTDOORS: To kill adult mosquitoes, treat
shrubbery, vegetation and other areas where mosquitoes
may rest. Direct application of this product to any body of water
is prohibited. Apply at the rate of one 20 oz can/250 – 375 ft² of
surface area. Reapply as necessary, but not more than 1 time/day.

PERIMETER TREATMENT - For crawling insects, such as
ANTS (excluding Carpenter Ants), Cockroaches, Crickets,
Earwigs, Pillbugs, and Spiders: Treat infestations of these
insects in outdoor areas which are landscaped, planted, mulched
or maintained. For ants, treat mounds and runways. Repeat
applications as infestation warrants and as reinfestations occur,
but not more than 1 time/day. Apply to cracks and crevices where
insects may enter premises. Areas to be treated include, weep
holes, under siding, wall voids, softs, around attic vents, cracks
and crevices, and openings around doors, windows and pipes.
Treatment of infested fences and tree holes is permitted. To help
prevent infestations of buildings, treat a band of soil 6 – 10 ft wide
around and adjacent to the building. Also, treat the building
foundation up to a maximum height of 2 – 3 ft and where pests are
active and may find entrance. Treat at the rate of 14 sec/100 ft².
